Who we are

Curve Dental is an industry-leading provider of enterprise cloud software for the North American dental industry. With development operations based in Calgary for over 12 years, Curve Dental has recently invested in expanding its development capacity with a new team in Scotland.

At Curve Dental development we use industry leading practices including Continuous Integration/Delivery (CI/CD), cloud hosting in AWS and automated test coverage - while fully embracing a dev ops culture in an agile environment.

Who we are looking for

We hire developers who are passionate about software development and technically excellent. Our developers work across the full stack of an application and understand that a project is not done until it has been deployed to production for our users. We want developers who can contribute positively to our culture and teach us things we didn't know before. Those same developers are always hungry to learn and improve in any way they can.

Things we're looking for in terms of more specific skill-sets and experience:

- BSc In Computer Science or related technical discipline (or equivalent)
- Extensive programming experience in a language that demands strong OO skills (C# / Java / C++ / etc.). Note that we don't use all these technologies; these are examples of the types of skills we look for
- Extensive experience working with JavaScript frameworks in a rich web application
- Experience with AngularJS and Angular 8+
- Code reviews & Continuous Improvement are a part of everyday life in your work
- Experience with database design and SQL
- Several years of software design and development experience
- A solid foundation in computer science, with strong competencies in data structures, algorithms, and software design
- Previous experience with agile development methodologies and unit testing
- An interest in working with industry-leading technologies such as Ansible, Angular, NetCore, AWS and BI
- Knowledge of Unix / Linux is beneficial but not essential

What we offer
- Remote working

- Private medical cover including dental and optical
- Life cover
- Pension
- Continuous Improvement & Learning Culture

Location

While the majority of our team is based in the Aberdeen area, we are willing and open to expand our search to hire fully remote employees in other locations within Scotland.
